PRODUCT CODE

NSC-111

PRODUCT DESCRIPTION

11.2" Wide Combo Flip Down Monitor with DVD

NARRATIVE

The NSC-111 introduces some exciting new features to the overhead combo market. A single NSC-111 unit can be colour matched to a variety of roof linings using the supplied choice of clip on covers in Grey, Beige or Black.

This model has the unique i-Pod docking feature, allowing your i-Pod to slide directly into the body. This removes the need to have cables hanging from the unit. These also have a "Mum switch" located towards the driver so it can be paused & unpaused from the front.

With USB & SD card reader inputs, the NSC-111 really is fully featured & ready for the highway.

The 11.2" wide screen 16:9 format swivel screen has the exceptional super VGA resolution of 2400x 480 pixels with an amazing 400 nits brightness.

The Korean made DVD loader plays just about any format you can throw at it & handles all region DVD's. When choosing a ceiling combo, compare the features & you will see that the NSC-111 is unmatched.
