

NESA

PRODUCT CODE

NSC-250

PRODUCT DESCRIPTION

Stylish overhead 10.4" Ultra Slimline Ceiling Combo

PRODUCT DESCRIPTION

A fully featured 10.4" big screen with all the features you could want. Full swivel for easier viewing and operation. Great for that big 4 wheel drive or motorhome.

Roof Mount Combo. Slim attractive design:- Most customers are attracted to a slim roof mount design. Bulky units look less attractive when installed.

Side loading vacuum DVD loader:- Side loading units allow easier access for both the rear seat and front seat passengers. Rear loading DVD's make it more difficult for a parent with small children to start and operate the system from the front seat.

Swivel Screen:- A swivel screen allows better angle for rear seat passengers and allows a parent in the front seat to more easily operate and play the DVD, for small children in the back.

Reliable proven DVD loader:- All our combos now have the proven and reliable Korean made DVS vacuum DVD loader.

In-built IR transmitter and Dome lights:- All our combos come with clear signal IR transmitters and dome lights. This means no connection to your current sound system is necessary, just tune in the radio for stereo quality sound.

Widescreen Operation:- All NESA combos can be operated in widescreen, zoom or normal mode.

Wide Picture Angle:- All NESA screens can be viewed from up to 150 degrees R & L. The screens have been treated with a low reflective coating and have excellent colour, contrast and clarity.

IR Headphones:- NESA headphones have proven themselves to be very reliable, quality units.
