

NESA

PRODUCT CODE

NSR-42D

PRODUCT DESCRIPTION

4.2" Rear Mirror Monitor (Dual Mount)

NARRATIVE

The NSD-42D is designed to our specifications to offer the very best in reverse mirror technology. With 12 or 24v inputs, 2 x audio video inputs & multiple mounting options, the NSD-42D is an extremely versatile screen solution where mounting room is scarce. Automatically powering on when an RCA signal applies changes this anti glare mirror into a high resolution reversing screen. Parking assist can be overlaid on the screen if desired & the system comes supplied with a universal bracket to suit most vehicles, which can be easily removed to allow the unit to be strapped to the existing OEM mirror if required. 2 x speakers allow a simple audio solution on both inputs. Brackets to suit Toyota & Honda are available as an option.
