CDV-300GPS

BARCODE: 9332820006902
9332820006896 w/GPS

PRODUCT DESCRIPTION: Super HD Dashcam with GPS or non-GPS Dock

NARRATIVE

For those who want nothing but the best, the CDV-300 featuring the new Ambarella A7L CPU, providing the clearest and sharpest video recording available, even at night. The CDV-300 features Super HD 1296p (2304 x 1296 dpi) recording, WDR (Wide Dynamic Range) processing for incredible low light performance, super bright f2.0 - 135° wide-angle lens with distortion correction, driver fatigue warning system, parking protection mode* to automatically begin recording if your vehicle is hit whilst unattended and a built-in G-sensor for file protection in case of an accident (the file will be locked so it can't be accidentally overwritten).

The CDV-300 is available in two kits, with a standard (non-GPS) dock or a dock with integrated GPS antenna for recording the vehicles location and speed. Additional GPS and non-GPS docks are available so the CDV-300 can easily be switched from car to car without the hassle of having to realign the mount as you would with a suction cup style mounting system.

Kits and accessories:

CDVCAR2: 2nd car kit - non-GPS dock and cigarette lighter power cable

CDVCAR2GPS: 2nd car kit - GPS enabled dock and cigarette lighter power cable
