PRODUCT DESCRIPTION: Rear View Mirror with Radar Detector Display
for Beltronics XRC-Plus and Escort 9500ci

NARRATIVE:

A sleek OEM look Rear View Mirror with integrated Radar Detector Display for the Escort 9500ci and the Beltronics XRC-Plus. This mirror display completely replaces your display module included with your radar detector. With your choice of a red or blue, the alphanumeric display consists of 280 individual LEDs, to provide an intuitive ultra-bright display of signal strength and warning messages exactly as your original display module. Display brightness can be controlled by the *BRT* button on the Escort/Beltronics control module as normal and the mirror display also features an Auto-Dimming sensor (separate 12v DC power required). Supplied with a universal mount to suit most vehicles, other mounts available separately.

SPECIFICATIONS:

Red display (NMR-35B) or Blue display (NMR-35E)	Displays text and signal strength exactly as original display module
280 Ultra-bright LEDs	Auto dimming sensor
Power requirement: Display powered via radar interface, separate 12v DC for Auto Dimming	Power Consumption: <2W
Operating Temperature: -20°C ~ +70°C	Storage Temperature: -30°C ~ +80°C
Dimensions: 270mm x 82mm x 43mm	Approx weight: 490g (including bracket)
Monitor bracket included	2m extension cable
Options: Different vehicle dependent mounts available	

DATE OF PRODUCT RELEASE: April 2013
